

Headliner special

The 1981 Graduates' Issue

Congratulations to the ninety-one sons and daughters of NDD employees who received diplomas from their acknowledged institutions of learning. The HEADLINER is pleased to honor these young people and their achievements within the pages of this special issue.

Two NDD'ers receive diplomas

Gary R. Conte

Sunday, June 14, 1981 was a special day for Gary R. Conte, senior industrial engineer. Gary received a Master's Degree in Business Administration from the University of South Florida.

In 1976, Gary graduated with a Bachelor of Science Degree in Management Engineering from Rensselaer Polytechnic Institute in Troy, New York. He became a member of General Electric's Manufacturing Management Program (MMP) in Auburn, Maine, and completed his MMP assignment in Louisville, Kentucky in 1978.

In 1978, Gary graduated from the Manufacturing Management Program, and joined NDD as an advanced process control engineer. He then set a goal to obtain his MBA in three years.

While attending night classes to complete the requirements for his MBA, Gary also completed two courses at NDD. In 1980, he graduated from the Manufacturing Studies Program and earlier this month he completed General Electric's Advanced Engineering "A" course.

Gary commented on his educational accomplishments. "I perceive a need for technically oriented managers, and every engineer should have some classes whether they be management, finance, or marketing. These courses have been most helpful to me in communicating with management."

With vacation just a week away, Gary plans to tour New England. After relaxing and catching up on his tennis game, he plans to work on a Master's Degree in Engineering and complete GE's Advanced Engineering "B" course.

Rick Haqan (right) proudly displays his diploma to Bill Sunderbruch (left) foreman of tube operation on second shift.

Congratulations to Frederick (Rick) N. Hagan who received an Associate Degree from St. Petersburg Junior College (SPJC) on May 13.

Hagan is currently a vacuum process operator on second shift. He joined NDD as a maintenance cleaner and has held several positions during the past three years.

Shortly after joining NDD in May 1978, Hagan decided to continue his education and enrolled at SPJC. During the past three years he has attended SPJC and in May completed the requirements for an Associate Degree.

Hagan is enrolled at the University of South Florida and will begin classes in August to further his education.

The HEADLINER asked Hagan what he thought of the tuition refund program. He stated, "It gave me the extra incentive I needed to pursue an education. And, best of all, the program covered all my courses, including graduation fees."
